THE JEWELLERS FILE - FEBRUARY 2010

Valid to end of month while stocks last

We are only 30days into the New Year but indications are that The Jewellery trade seems quietly optimistic about 2010. This optimism seems to be supported by the National Australia Bank's *Australian Markets Weekly* report forecasting an expected growth in business investment from the June quarter, along with positive employment growth. On the down side another 0.25% interest rate rise is likely in February and possibly March as well. Now if any of that suggests an awesome business strategy to you, give me a call (07 3218 6601).

Meanwhile **AJS** will be striving to provide our customers (you) with the best combination possible of high quality products, service and technology at highly competitive prices. Regards Ian Martin

### Important note for our highly creative clients:
